

DATA SHEET

Part Number: TH04-0104
 Description: Iron Powder Threaded Core

Dimensions:		in.		mm.
Diameter:	0.111 +/- 0.001 (0.112 / 0.110)		2.82 +/- 0.03 (2.84 / 2.79)	
Length:	0.250 +/- 0.010 (0.260 / 0.240)		6.35 +/- 0.25 (6.60 / 6.10)	

Drive: 1 Full Slot
 Thread: #4-40 - Shallow per MPIF Standard

Material Characteristics:
 Material Type: Micrometals Mix-4
 μ_r (reference) 9 (reference)
 Temperature Stability +280ppm/K typical
 Frequency Range 3 - 40 MHz

Finish: None

Note: Core surface will rust if exposed to high humidity and rain or not handled with cotton gloves. The Thermal Aging properties of Micrometals Mix -4 are unique to Micrometals alone and not our competitors. Other material properties as described in 2019 Iron Powder Product Catalog. Micrometals Iron Powder Cores comply with the EU Directives 2002/95/EC and 2003/11/EC. Any possible unintentional RoHS trace elements present are less than 100 ppm.
