

DATA SHEET

Part Number: TH26-0403  
 Description: Iron Powder Threaded Core

Dimensions:	in.	mm.
Diameter:	0.161 +/- 0.001 ( 0.162 / 0.160 )	4.09 +/- 0.03 (4.11 / 4.06)
Length:	0.375 +/- 0.010 ( 0.385 / 0.365 )	9.53 +/- 0.25 (9.78 / 9.27)

Drive: Partial Slot - each end  
 Thread: #8-32 - Shallow per MPIF Standard

Material Characteristics:  
 Material Type: Micrometals Mix-3  
 $\mu_r$ (reference) 35 (reference)  
 Temperature Stability +255ppm/K typical  
 Frequency Range 0.02 - 1 MHz

Finish: None

Note: Core surface will rust if exposed to high humidity and rain or not handled with cotton gloves. The Thermal Aging properties of Micrometals Mix -3 are unique to Micrometals alone and not our competitors. Other material properties as described in 2019 Iron Powder Product Catalog. Micrometals Iron Powder Cores comply with the EU Directives 2002/95/EC and 2003/11/EC. Any possible unintentional RoHS trace elements present are less than 100 ppm.
