

DATA SHEET

Part Number: TH36-0103F
 Description: Iron Powder Threaded Core

Dimensions:	in.	mm.
Diameter:	0.180 +/- 0.001 (0.181 / 0.179)	4.57 +/- 0.03 (4.60 / 4.55)
Length:	0.375 +/- 0.010 (0.385 / 0.365)	9.53 +/- 0.25 (9.78 / 9.27)

Drive: Partial Slot - each end
 Thread: #10-32 - Shallow per MPIF Standard

Material Characteristics:
 Material Type: Micrometals Mix-3
 μ_i (reference) 35 (reference)
 Temperature Stability +255ppm/K typical
 Frequency Range 0.02 - 1 MHz

Finish: None

Note: Core surface will rust if exposed to high humidity and rain or not handled with cotton gloves. The Thermal Aging properties of Micrometals Mix -3 are unique to Micrometals alone and not our competitors. Other material properties as described in 2019 Iron Powder Product Catalog. Micrometals Iron Powder Cores comply with the EU Directives 2002/95/EC and 2003/11/EC. Any possible unintentional RoHS trace elements present are less than 100 ppm.
