

DATA SHEET

Part Number: TH48-2002
Description: Iron Powder Threaded Core

Dimensions:	in.	mm.
Diameter:	0.248 +/- 0.001 (0.249 / 0.247)	6.30 +/- 0.03 (6.32 / 6.27)
Length:	0.500 +/- 0.010 (0.510 / 0.490)	12.70 +/- 0.25 (12.95 / 12.45)

Drive: Hex
Thread: #1/4-40 - Shallow per MPIF Standard

Material Characteristics:
Material Type: Micrometals Mix-2
 μ_i (reference) 10 (reference)
Temperature Stability +95ppm/K typical
Frequency Range 0.25 - 10 MHz

Finish: None

Note: Core surface will rust if exposed to high humidity and rain or not handled with cotton gloves. The Thermal Aging properties of Micrometals Mix –2 are unique to Micrometals alone and not our competitors. Other material properties as described in 2019 Iron Powder Product Catalog. Micrometals Iron Powder Cores comply with the EU Directives 2002/95/EC and 2003/11/EC. Any possible unintentional RoHS trace elements present are less than 100 ppm.
